

Bluestock Mutual Fund Dashboard Development Walkthrough

We have successfully developed, compiled, and verified all the deliverables for the **Bluestock Mutual Fund Dashboard** project. The implementation includes an interactive HTML5/CSS3/JS application dashboard, automated export scripts using Google Chrome CLI, and a Power BI Project (.pbip) folder structure.

Deliverables Generated in Root Directory

1. [bluestock_mf_dashboard.pbix](#): A zipped Power BI Project archive containing semantic models, relationships, and layout rules.
 2. [Dashboard.pdf](#): A premium landscape multi-page compiled PDF report containing all 4 dashboard pages.
 3. [page1.png](#), [page2.png](#), [page3.png](#), [page4.png](#): Individual high-resolution page screenshots.
-

Changes Made

1. Data Synthesis & Compilation

- [nifty50_synthesis.py](#): Synthesized historical monthly Nifty 50 close price values matching the 2022–2025 timelines.
- [prepare_data.js.py](#): Read all 8+ CSV files and compiled the tabular records into a single script-based JSON datastore `dashboard/data.js` to bypass browser local file CORS restrictions.

2. Premium Interactive Web Dashboard

- [index.html](#): Developed a modern single-page dashboard containing grid layouts, KPIs, slicers, scorecard, and NAV details.
- [style.css](#): Structured the design system with Bluestock primary color `#414BEA`, dark theme slate tones, rounded edges, hover animations, and custom print settings.
- [app.js](#): Wired dynamic logic using Chart.js to render complex charts (scatters, dual-axes, lines, heatmaps) and enabled interactive features (scorecard search, row sorting, slicer filters, and drill-through).

3. Exporters & Builders

- [generate_dashboard_assets.py](#): Spawns a silent local background HTTP server and runs Chrome headless CLI to render the pages, take absolute screenshots, and compile them to a landscape PDF report.
- [generate_pbip.py](#): Generates the Power BI Project schema, database configurations, table list, and relations.
- [create_pbix_file.py](#): Zips the project files into a template-based `bluestock_mf_dashboard.pbix` archive.

Verification Results & Screenshots

All 4 pages of the dashboard render cleanly. Below are the visual captures of the pages:

Page 1: Industry Overview

- **KPI Cards:** Total Industry AUM (₹81L Cr), Monthly SIP Inflows (₹31K Cr), Total Retail Folios (26.12 Cr), and Active Schemes (1,908).
- **AUM Trend:** Industry growth curve from 2022 to 2025.
- **AUM by AMC:** Top 8 AMCs bar chart highlighting SBI dominance.

Page 2: Fund Performance & Scorecard

- **Filters:** Slicers for Fund House, Category, and Plan Type.
- **Diagnostics:** Return vs risk standard deviation scatter plot.
- **NAV Comparison:** Interactive NAV trend comparison with Nifty 50.
- **Scorecard:** Sortable, searchable list of 40 schemes with a detail drill-through button.

Page 3: Investor Demographics & Analytics

- **Filters:** State, Age Group, and City Tier.
- **Visuals:** State transaction bar, SIP/Lumpsum/Redemption split donut, age group vs average SIP amount bar, and monthly transaction volume lines.

Page 4: SIP & Market Trends

- **Dual-Axis Chart:** Monthly SIP Inflow (bars) vs Nifty 50 index (line) over 2022–2025.
- **Inflow Heatmap:** Inflow/outflow heat grid for categories vs months.
- **Fiscal Leader:** Top 5 categories by net inflow during FY25.
